Multiroom Audio

Imagine your entire music collection at your fingertips. No more flipping through hundreds or thousands of CDs to find just the right one for the moment. With a music server you can import your music library to a dedicated hard-drive and access any disc or song in seconds.

Home entertainment has become an essential element in most homes. In a world dominated by the media, the Internet, portable music, cell phones and instant access, we have grown to expect our entertainment to be at our fingertips whenever we reach for it. Your expectations can now be fulfilled.

Whole house connectivity And access now means that numerous input sources such as iPod's, iPhones, Music servers, SKY etc can be selected in many different ways to your controllers and audio equipment.

Audio system design , supply and installation by our own technicians.

Listen

Experience true 3D Home Cinema

Air Conditioning

STYLE Installations design , supply and install many types of air conditioning systems, all designed to be aesthetically pleasing while offering ultimate energy efficiency and control.

Whole house ducted systems can now be incorporated into any new build or refurbishment. The new systems available allow clients to have practically no equipment on show, while having full heating, cooling and dehumidification .

Modern air conditioning systems are over 300% energy efficient and can be integrated into any control situation. One outdoor condensing unit , which only requires a 20amp single phase supply is now available to heat and cool up to 8 rooms .

Working within client requirements STYLE Installations calculate the required heat loading for each area, select the equipment required and develop a fully installed quotation for the complete works package.

- Server Rooms
- Showrooms

Lighting Control

At STYLE Installations we believe that lighting and lighting control is probably the most important aspect of any development or refurbishment. The design and integration of user control can determine moods, effects and more importantly control required power.

Set the mood at the touch of a button, turn the entire lighting in the property off with one button while setting the property to the required security lighting levels.

Working closely within client briefs we formulate a lighting solution, which can be pre wired by your own electrician based on our proposals, STYLE Installations technicians then install the equipment, switching points and programme the system to your specifications

Let There Be Light !

Design

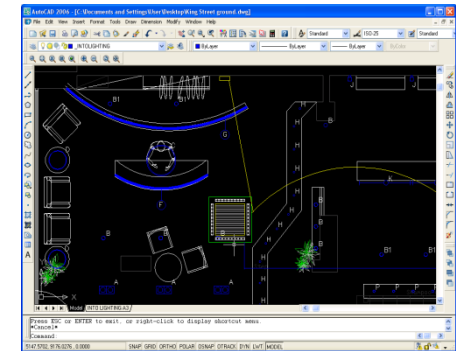

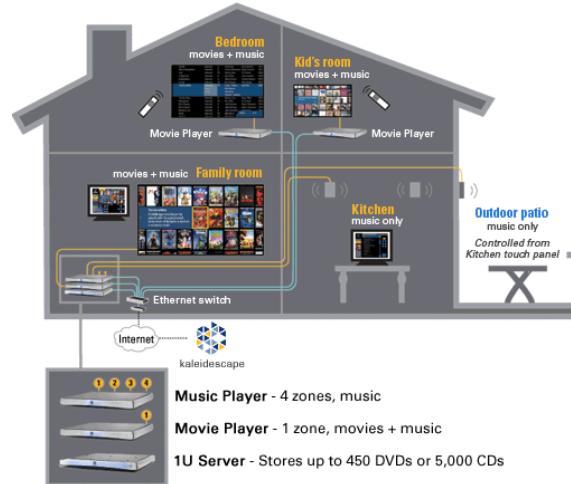

Employing the latest design technology STYLE Installations works closely with designers, architects, construction companies and clients, to deliver bespoke solutions.

Production of working drawings and wiring schedules, enables STYLE Installations to work closely with all onsite trades.

Close attention is paid to future proofing projects and ensuring our clients have seamless integration of in-house systems.

- Total Control
- Security
- Energy efficiency
- Seamless Integration
- Quality
